

ALLEGHANY HIGH SCHOOL CELEBRATES 1:1 INITIATIVE SUCCESS!

Students and Teachers Gather For Photo

Low Moor, VA, February 20, 2017– Recently, the students, faculty, and administration of Alleghany High School gathered for a group photo in celebration of the successful roll out of the school’s one-to-one initiative which provided every student with a personal computing device.

As stated in the Alleghany County Public School division’s Vision 2020 plan, “The use of technology and technology resources in instruction enhances individual learning, student engagement, and results in students developing a personal motivation to learn.”

The Initiative’s planning stages began last spring and have continued throughout this year with network construction, instructional training, and device configuration being completed. Students received Chromebooks on January 6, 2017.

Preparations are now underway at Clifton Middle School. Devices are set to be distributed to the middle school students during the 2017-2018 school year.
